

KIWI TOOLING

Suppliers of high performance tooling board

KT/P480 POLYURETHANE TOOLING BOARD

New to the range, our most economic product.

Easily machined or hand worked, yet will seal or paint to a smooth finish.

Very easy to machine forming chips rather than dust, for a cleaner safer working environment.

APPLICATIONS

- Models and props
- Sculpting
- CNC applications
- Mould construction

P480

Colour

Apricot

Hardness @ 75°F

45 Shore D

Density

0.42 g/cm³

Maximum operating Temperature

60

Coefficient of Thermal Expansion

55 - 60 x 10⁻⁶

Flexural strength , MPa

14

Compressive strength, MPa

10

Glass Transition Temperature

110

Sheet Size: 1500x500

Thicknesses stocked: 50mm, 75mm, 100mm
